SUMMARY

Product-minded engineer who has shipped AI systems into live business operations, both as a TPM inside a \$3B public company and as the founding engineer of a fast-scaling startup, owning outcomes end to end. Seeking Summer 2027 internships in product, program, and solutions roles.

EDUCATION

Seattle University Seattle, WA
B.A. Computer Science, Minor in Global Business | GPA: 3.87 *Expected June 2028*
• Study abroad: **Sogang University**, Seoul, with direct exposure to Korea's startup ecosystem

EXPERIENCE

AMPACC Law Firm Aug. 2026 – Present
AI Workflow Intern (part-time alongside full course load) *Seattle, WA*
• Build and ship **AI workflow integrations** for the firm's legal and operational processes, translating requirements from **attorneys and non-technical staff** into production systems
• Own the integration codebase end-to-end, **deploying production services on Azure** through a continuous push-to-deploy pipeline

HardLaunch (UGC marketing agency, spun out of Jenni.AI) Feb. 2026 – Aug. 2026
Founding Engineer, Product & Growth (Feb–Jun); Technical Advisor (Jun–Aug) *Seoul, SK*
• First full-time hire; owned the technical roadmap, growth KPIs, and product execution, and built the company's technical operation from the ground up
• Built the automation engine that helped win the company's inaugural **enterprise pilot** with a leading AI developer-tools platform, generating **297M+ organic views** in one month at zero paid spend
• Built internal operations platform enabling **non-technical staff** to run AI-assisted production workflows at scale, with analytics, review gates, and automated payouts

Jenni.AI Jun. 2025 – Feb. 2026
Software Engineer, Growth (first intern to convert to full-time) *Seoul, SK*
• Owned product growth for **CiteSure**, an acquired citation tool at \$4.9K MRR; **tripled revenue to \$15K+ MRR** through A/B testing, UI redesign, location-based parity pricing, and traffic-source-tuned landing pages
• Instrumented **PostHog** experiments driving **2–3× conversion lifts**; shipped full-stack features across 6 acquired codebases (**TypeScript, React, Supabase, Firebase**)
• Led **technical transfer** of codebases, infrastructure, and systems from strategic acquisitions into Jenni's growth stack; maintained portfolio totaling **\$1.35M** in assets

Entegris (NASDAQ: ENTG, \$3B semiconductor materials) Jan. 2025 – Jun. 2025
Technical Program Manager Intern *Boston, MA*
• Scoped and shipped custom **Copilot Studio AI agents for executive workflows**; ran discovery with business stakeholders, authored technical specs, and drove cross-functional review across engineering and business units
• Designed dashboards and data pipelines aligning product roadmap with enterprise sustainability KPIs
• Redesigned corporate reporting interfaces in **Figma**; recognized as one of the department's strongest interns

Jenni.AI Sept. 2024 – Dec. 2024
Software Engineering Intern *Remote, US*
• Integrated **Groq, Cloudflare Workers**, and custom **JSX** into Framer landing page, scaling traffic to **60K+ MAUs**; led a 4-developer pod through weekly sprints with CPO, UX, and marketing

PROJECTS

Candid (The Fluency Project) | Product Engineer, work trial 2026
• Built conversational onboarding end to end across iOS (SwiftUI), backend and tutor dashboard: video clip pipeline (S3, Mux, ElevenLabs), answer classification, and an authoring tool; 15 PRs merged in 4 weeks

Ad4You | AI-personalized video ad pipeline: persona → storyboard → synthesis (Python, OpenAI, React) 2025

TECHNICAL SKILLS

AI Systems: OpenAI, Anthropic, Gemini, Groq, Microsoft Copilot Studio; multi-model orchestration, cost-per-output optimization, agent workflows; AI-assisted development (Claude Code, Cursor)
Languages: Python, TypeScript/JavaScript, SQL (Postgres), HTML/CSS
Product & Analytics: PostHog, Figma, Stripe, A/B testing, KPI instrumentation, REST APIs
Frameworks & Infra: React, Next.js, Node.js, FastAPI; Supabase, Firebase, Vercel, Azure, GCP, Docker, Git
